

AI-Driven Test Automation Platform - Project Test rigor

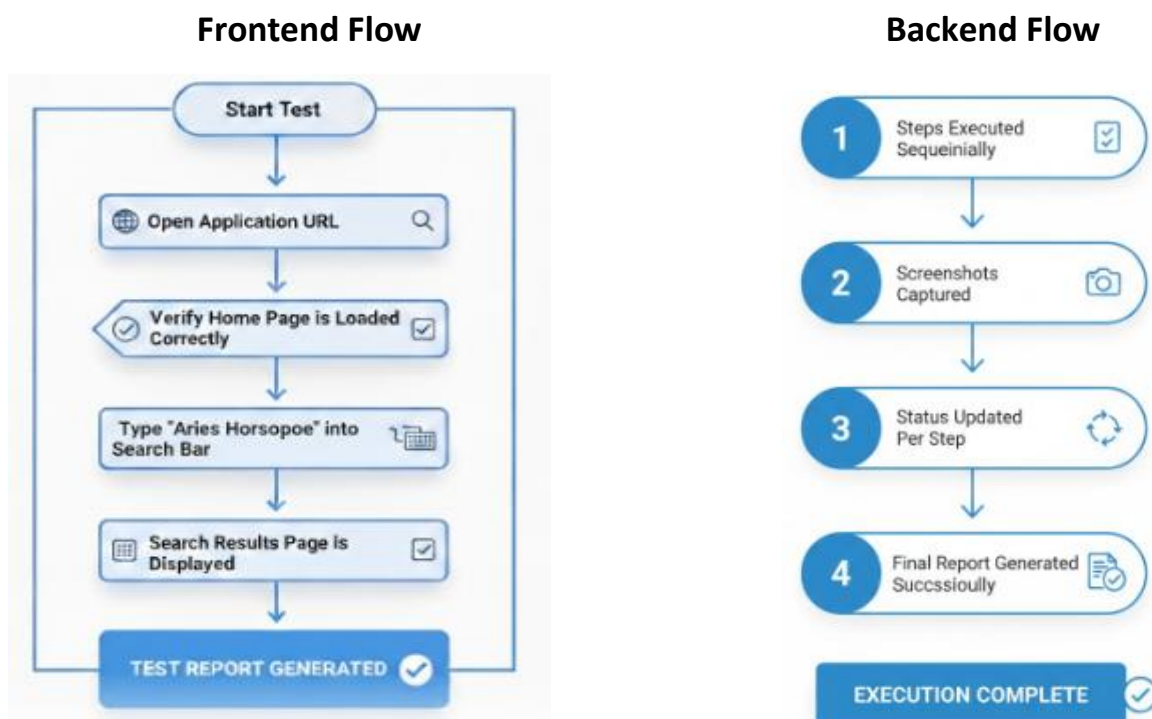

1. Introduction

This project focuses on designing and developing an **AI-driven end-to-end test automation platform**, inspired by tools like **Test-Rigor**, with the goal of providing a free, simple, and intelligent automation solution. The system allows users to write test cases in human-readable English, which are then automatically parsed, executed, and reported using modern automation technologies.

2. Working model

- Enable users to write test cases in plain English
- Convert human-readable steps into structured automation steps using AI
- Execute test cases using a reliable browser automation engine
- Capture step-by-step execution evidence
- Generate a clear and user-friendly test execution report
- Provide an end-to-end automation workflow with minimal manual intervention

3. Sample Test Case Workflow

4. Future Enhancements

- Parallel test execution
- Dashboard analytics
- Real model deployment

5. Conclusion

This project **AI-powered test automation platform** that simplifies automation using natural language. By combining AI parsing, Playwright execution, evidence collection, and reporting, the system delivers a complete end-to-end automation solution.
